

## Preface

These are the proceedings of the International Scientific Conference on Information, Control, and Communication Technologies (ICCT) which had been held October 2-6, 2023 in Astrakhan, Russian Federation.

The main technical areas and applications covered by the proceedings are optoelectronics, acousto-optic, microwave technology, antenna systems, measuring technology, metamaterials, nanostructures, nanofilms, photonic crystals, biology and medicine, biophotonics, bioengineering, neural networks in communication technologies; 5G/6G systems; optical and millimeter-wave communication systems; defectoscopy and non-destructive testing of materials and devices for radio- and microelectronics; problems of reliability; automated control systems; diagnostics, etc. The Proceedings can be interesting for specialists in the communications and control systems.
